WEIGHTED GRADING 5

Overview

Super Grader is a digital EZ Grader with the added functionality of weighted grading.

Installing Super Grader

- 1. Select the App Store icon on your iPhone or iPad
- 2. Select Search
- 3. Type in Super Grader
- 4. Select the Super Grader icon shown in Figure 1
- 5. Select Get and enter iTunes user and password when prompted

Figure 1.

Calculate Grade

Enter the total number of questions into the box named Total Q's at the top of the screen, shown below in Figure 2. Next select either the missed, score or percentage wheel, this will result in the corresponding grade and percentage being calculated and displayed at the bottom of the screen.

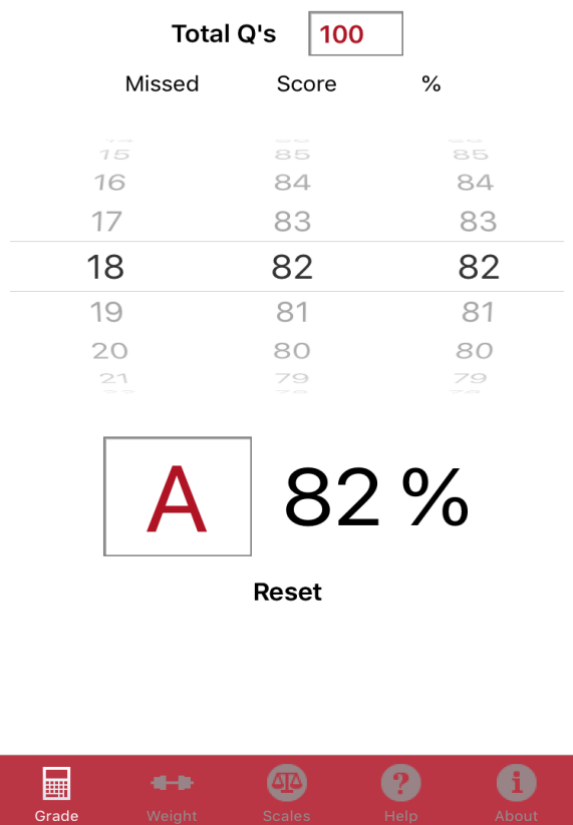

Figure 2.

Configure the Grade Ranges

Not all schools use the same grade ranges; the default values are shown below. To change these ranges, select the Scales tab. Next tap the edit button at the top right corner of the screen, see Figure 3.

The screen is now in edit mode. The – symbol now appears on the left of the screen alongside each grade entry.

Tap the – symbol next to the grade that you wish to remove. The Delete button now appears on the right-hand side of the Grade, see Figure 4. Tap Delete to remove it. A minimum of one Grade range is required. If you remove all grades, a message will appear to inform the user of this.

Weighted Grading

Super Grader supports up to 6 weighted scores. The sum of the sections percentage values cannot exceed 100. Exceeding 100 will force a reset. It displays the running percentage total at the top of the screen.

To begin select S1 (Section 1) and scroll the percentage wheel to the required percentage. Next, scroll the score wheel to the required score.

Repeat this process until the sum of the sections is equal to 100. Once this total percentage is 100, it displays the weighted grade at the bottom of the screen alongside the final score. Fig 7 shows an example of the weighted grade screen.
